The Drain Office is currently working through the last permit and producing revisions and instructions needed for the next permit cycle. We will be contacting each community individually to make you aware of available instructions. Ideally, your complete application will be finished by March 15th. Our permit application is due April 2023, we will be taking notes to share with you as we work through it. We are also nearly complete with the simplification of our new IDEP and PEP plans. The instructions will be released as we complete them. In the meantime, feel free to get started while you wait and adjust as necessary or work along with us as we release information however you are more comfortable. Our goal is to have links to instructions on SharePoint within the next 2-3 weeks.
