***March 1, 2021-March 1, 2022
Reporting Period***

Prepared by:

***The Genesee County Drain Commissioner SWM
On behalf of Genesee County and contracted Communities***

This report summarizes activities completed for the period from March 1, 2021, to March 1, 2022, by the Genesee County Drain Commissioner's Office and the contracted Phase II Municipalities to meet the requirements of their National Pollutant Discharge Elimination System (NPDES) permit. This report is broken into six sections to coincide with the MI Waters website.

- PPP
- PEP
- **IDEP – Illicit Discharge Elimination Program**
- General Permit Requirements

The Illicit Discharge Elimination Plan (IDEP) is a program to eliminate illicit discharges and connections, including the discharge of sanitary wastewater, to Municipal Separate Storm Sewer System (MS4). The County agent through a contract with the referenced communities conducts dry weather screening of all municipal separate storm sewer system (MS4) outfalls and point of discharges

Dry Weather testing is performed over the permit cycle. This section summarizes the IDEP activities including the ***illicit connections** identified during the 2021-2022 IDEP field investigations. Dry Weather Screening after February 15, 2022 will be reported in next reporting cycle.

Outfalls – Dry Weather testing
